A**T**HENIAN TECH

WE HELP YOU PROTECT YOUR BUSINESS

About us

Athenian Tech is a Digital Risk Management Company providing Artificial Intelligence, Machine Learning powered technology solutions to protect Digital Identity for businesses. Athenian Tech offers 360 degree protection against advanced digital and cyber threats. Athenian Tech platforms focus on protecting businesses from identity thefts, frauds, social engineering attacks, APT, ransomware attacks, cryptojacking emerging threat vectors from Dark, Deep, Surface Web.
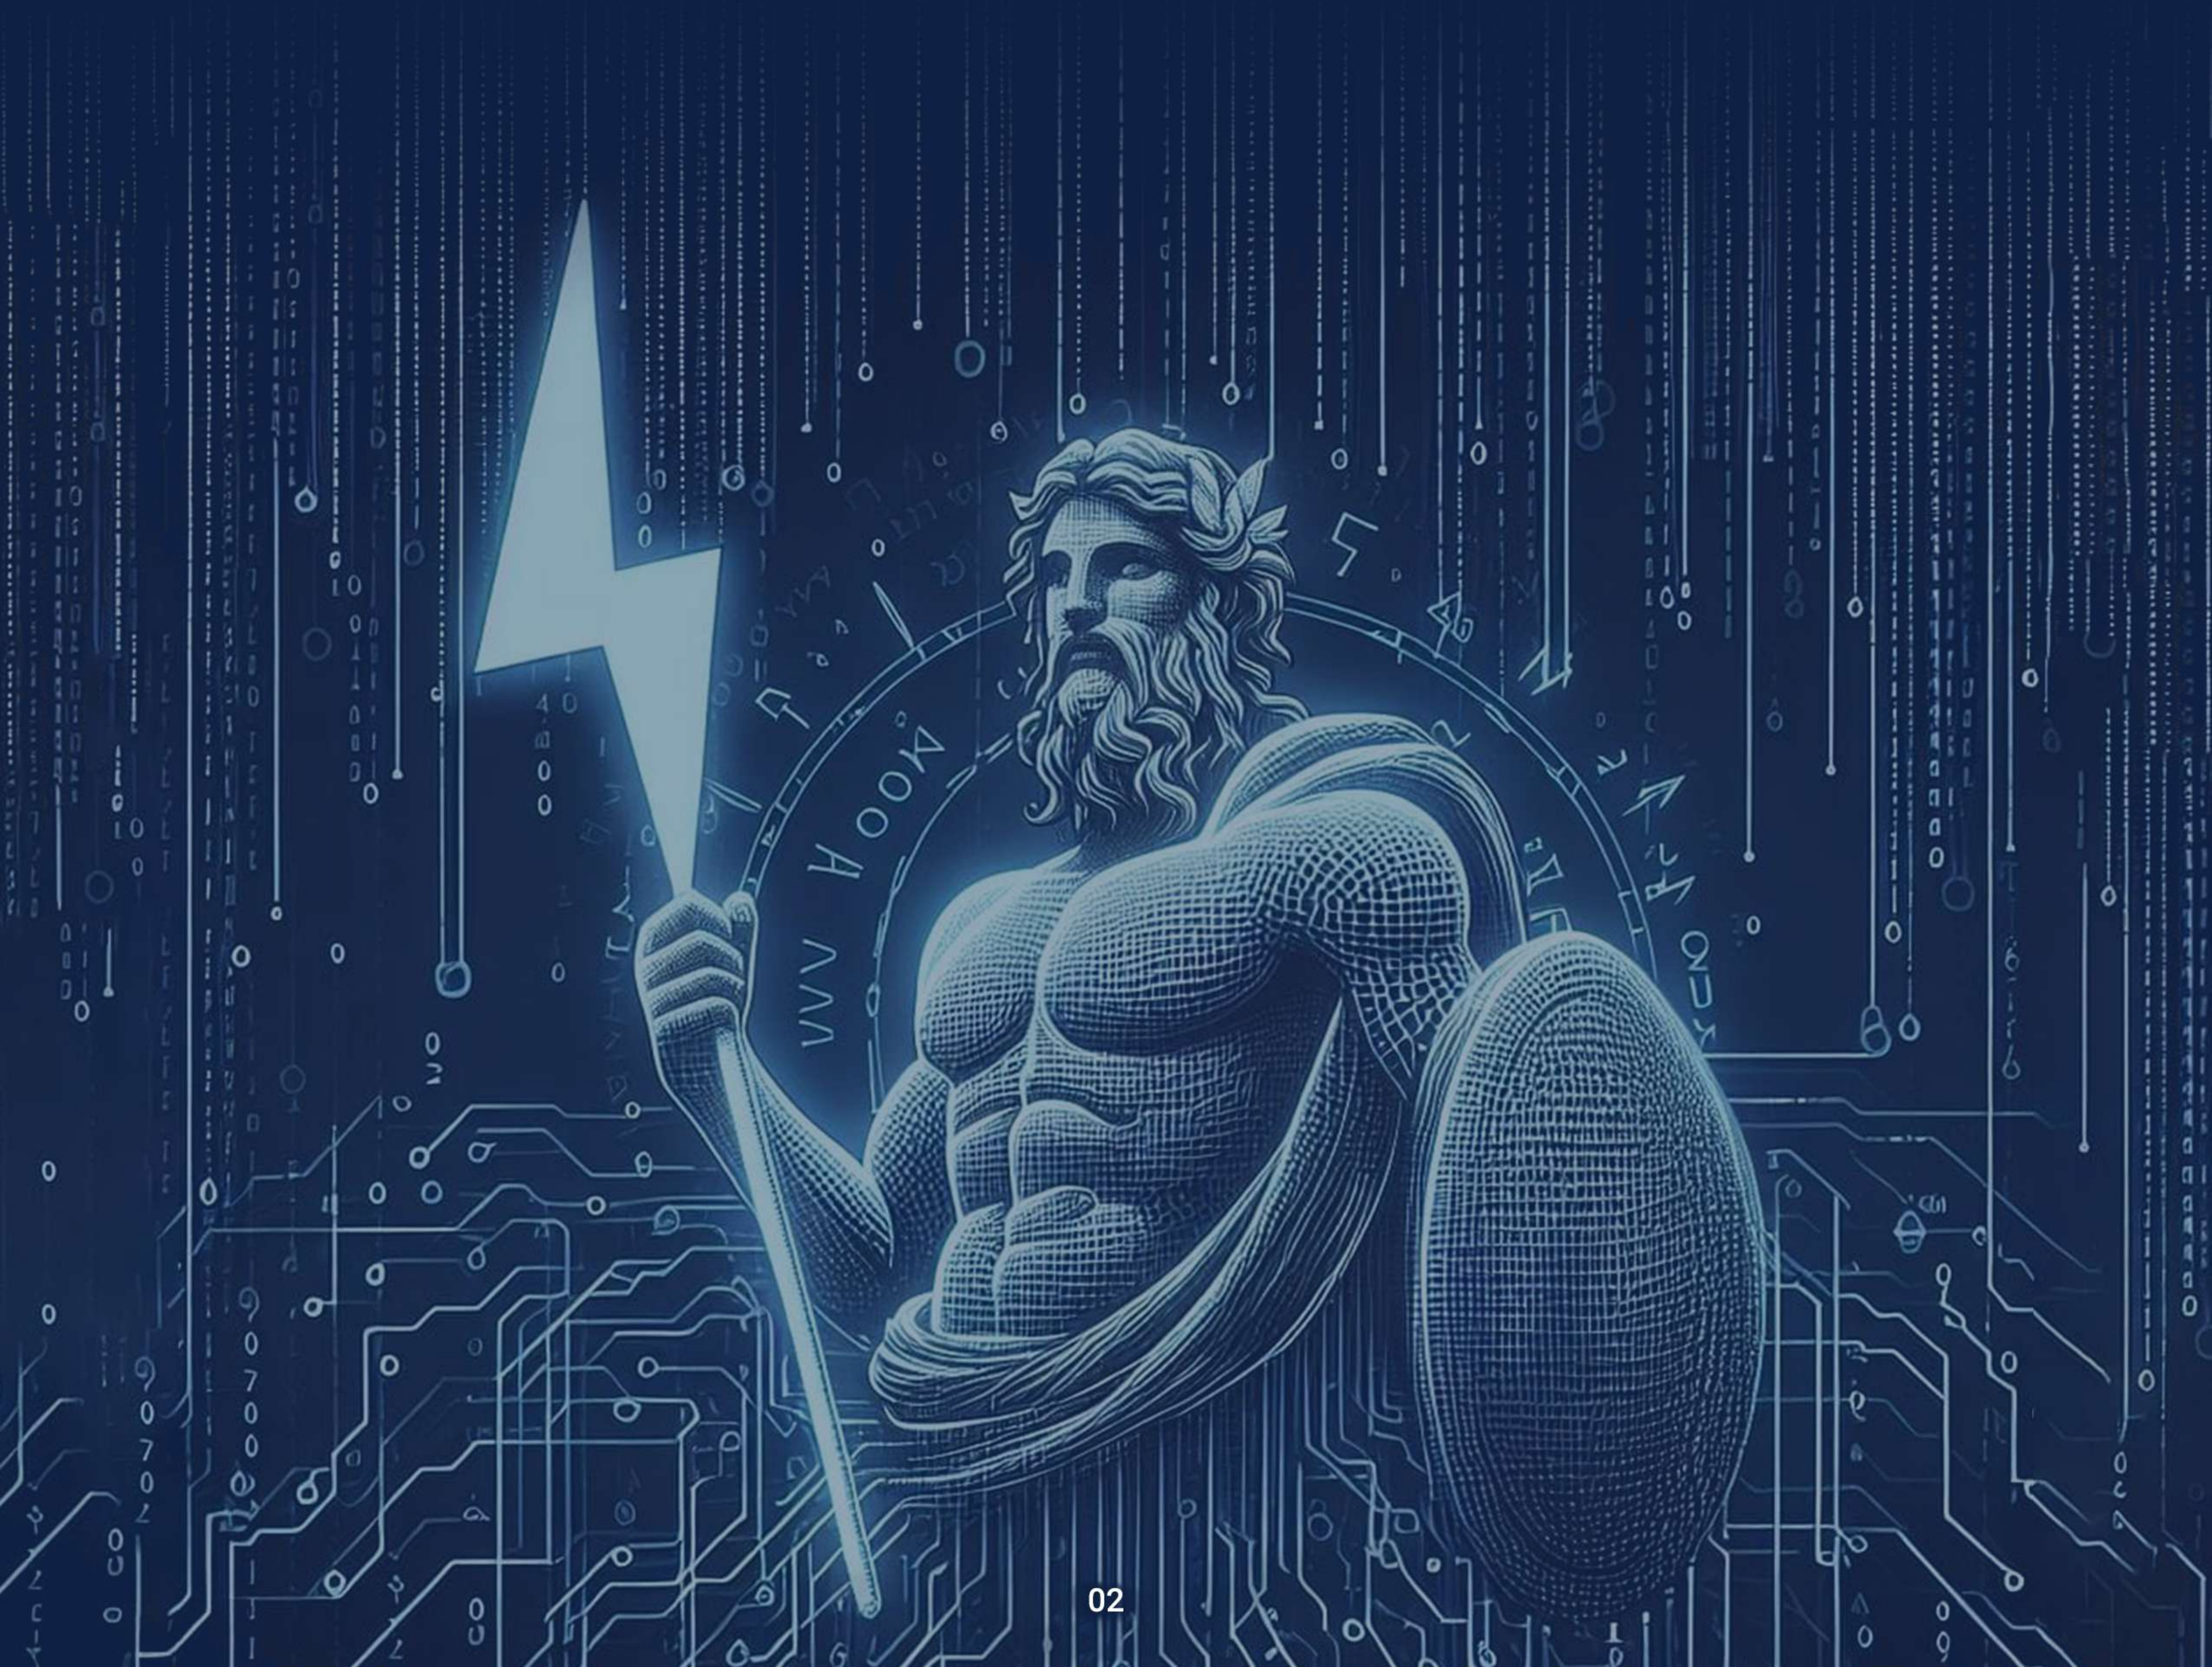

Our Proposition to Protect Business from Cyber Threats

Athena - Digital Risk Management Platform

Athena is a SAAS based digital risk management platform that offers organizations a 360-degree posture view about their brand, reputation, social media, web and mobile-specific risks. Through its AI and ML learning algorithm, Athena provides a digital state of maturity from a people, process and technology standpoint.

Thunder Bolt - Digital Identity Protection Platform

Thunderbolt is the world's first AI and ML-powered digital identity protection platform . It safeguards users' digital identities and helps them maintain a healthy security posture. Thunderbolt looks at user privacy, cyber safety, and fraud prevention to help users sustain a healthy digital well-being.

Prime - Risk Intelligence as a Service

Prime is a SaaS based Risk Intelligence Platform that provides in-depth insights into the cyber threat landscape. It utilizes Artificial Intelligence (AI) and Machine Learning (ML) to offer preemptive threat detection and response, that includes continuous monitoring, analysis and reporting on potential threats.

What Athena offers?

Digital Risk Monitoring

This assessment protects your company's data from data leaks, breaches, and illicit data sales on various deep or dark websites, forums, and chat rooms, including TOR, I2P, and paste sites. It protects your company's proprietary and sensitive data, from email addresses to product plans and financial data, from thieves attempting to steal or leak it online. Combining deep learning-enabled technology with a team of cybersecurity specialists offering 24/7 monitoring, analysis, and incident response, continuously forecast, prevent, identify, and respond to advanced threats rapidly and effectively.

Cyber Squatting
Brand Risk
SSL Expiry
Social Media Sentiment Analysis
Shadow IT
Monitoring Illegal Activities
Breached Credentials
Leaked Documents
SPAM

Dark Web Monitoring

The Dark Web Monitoring solution is designed to track and analyze illegal activities that occur over the hidden dark net. This solution typically focuses on identifying compromised or breached credentials, sensitive information and potential threats to the organization, under study. The platform employed to monitor the dark web employs AI-powered solutions to scan dark web marketplaces, forums and onion websites to identify/locate an organization's data. Athenian Tech's dark web monitoring empowers organizations to protect their brand reputation, intellectual property and threat detection.

Dark Web
Surface Web
Breach Credentials
Hacking Forums
Deep Web
Github Repositories
Private Chat Rooms

Supplier Risk Monitoring

The Supplier Risk Monitoring solution ensures the security and compliance of third-party vendors and suppliers. With comprehensive digital footprint assessments, vulnerability scanning, and compliance checks, the platform helps organizations mitigate supply chain risks effectively. By facilitating continuous monitoring, incident response collaboration, and performance analysis, Athenian Tech's Supplier Risk Monitoring enables businesses to manage supplier-related risks and ensure a secure supply chain proactively.
